

ColorDry® XL3000 IR Dryers

the Elegance of Intelligence

Optimized Safety, Printing & Performance with Intelligent Power Management

- ▶ High speed printing, diecutting and finishing in a single pass
- ▶ Dry trapping for improved color brilliance and quality
- ▶ Minimized or eliminated tracking, marking, smearing & ghosting
- ▶ Significant reduction of waste

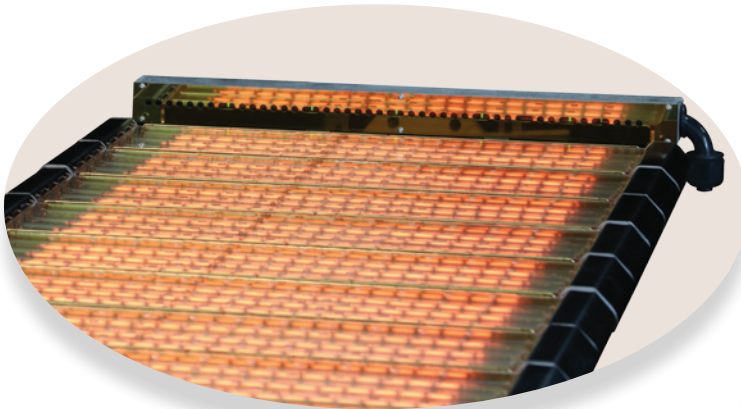

Productivity — Quality — Profitability

Flexo inks dry by evaporation. Unless this process is accelerated through the use of dryers, ink will not trap color on color and will mark when inline diecutting and/or stacking.

So Why **ColorDry XL3000**?

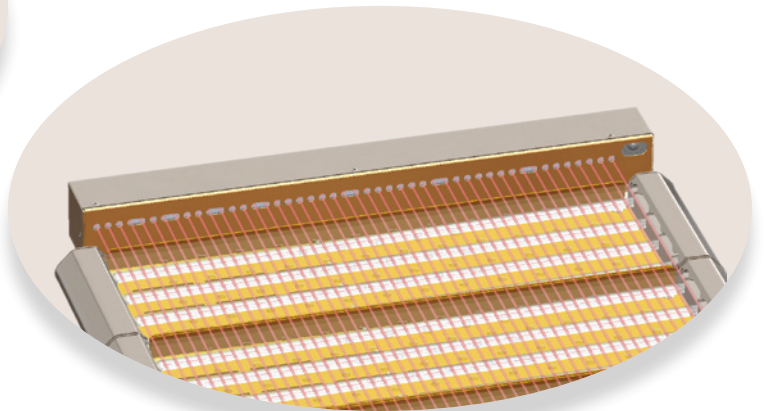

Features/Advantages

- The Safest IR Dryer
- The Highest Performance IR Dryer
- Sentinel™ Sheet Detection
- VisionMaster® – In Press dryer inspection & monitoring

Benefits

- High speed printing, diecutting and finishing in a single pass
- Improved ink on-press stability
- Dry trapping for improved color brilliance and quality
- Minimized or eliminated tracking, marking, smearing & ghosting
- Significant reduction of waste

Optimizing Productivity & Print Quality
