# ColorDry XL3000®

with AutoDryer Control™

Automated Drying for Optimized Safety, Performance & Sustainability

▶ **High speed printing and converting in a single pass**

▶ **AutoDryer Control with latest AI technology**

▶ **Dramatically reduces energy consumption and carbon footprint**

▶ **Eliminates operator intervention**

AutoDryer Control
Winner of the 2023 FEFCO Silver Award for Best Innovation (for energy savings and resource optimization)

ColorDry XL3000
with AutoDryer Control

Flexo inks dry by evaporation. Unless this process is accelerated through the use of dryers, ink will not trap color on color and will mark when inline diecutting and/or stacking.
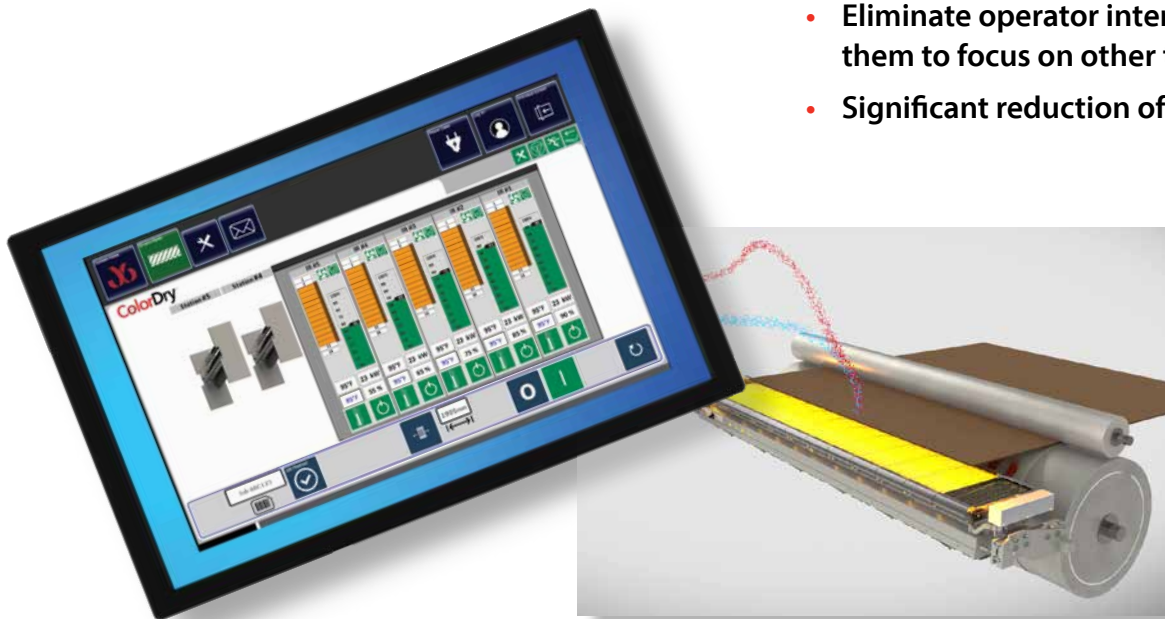

So Why ColorDry XL3000?

Features/Advantages

- Sentinel® Sheet Detection
- The Safest IR dryer
- AutoDryer Control – automatic power & temperature control
- The highest performing dryer

Benefits

- High speed printing, diecutting and finishing in a single pass
- Improved on-press ink stability
- Dry trapping for improved color brilliance and quality
- Lowest energy consumption of any IR dryer
- Eliminate operator intervention, allow them to focus on other tasks
- Significant reduction of waste

AutoDryer Control (ADC) automatic power and temperature control

Optimizing Productivity & Print Quality
